

ENVIRONMENTAL POLICY

The management of WM Waste Management Services recognise the need for all companies both large and small to take a role in protecting the environment for the future.

Due to the nature of our business activities, we are aware of the constant need to monitor and promote environmentally responsible practices, to this end WM Waste Management Services pledge to:

1. Take a leading role in the waste management industry by setting an example of environmental management excellence.
2. Set and monitor objectives and targets to ensure continual improvement of our environmental performance.
3. Comply with applicable legal requirements and adopt all new industry standards and where possible exceed them, by economically viable application of the best available technology.
4. Take measures to reduce resource consumption, minimise environmental impacts and prevent pollution.
5. We shall endeavour to supply information to our customers on the proper handling, use and disposal of products and services provided by WM Waste Management Services.
6. Train all staff to best business practices and ensure that all contractors meet our high standards. Foster a sense of responsibility for the environment among employees at all levels.
7. Prevent and minimise accidents through planning and staff training. Co-operate with public authorities to ensure that contingency procedures to limit the impact of any accidental discharges to the environment are established and updated.
8. Set up and maintain contingency procedures for incidents, and to train the staff in their application.

To ensure that these pledges are carried out the Managing Director of WM Waste Management Services shall ensure the resources necessary to implement this policy are provided.
